Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

The closest prior art of record is CheckFree's Recon-Plus for Windows (hereinafter "Recon-Plus"). Recon-Plus teaches an organization-wide reconciliation application which lets a user automatically balance an account, including when single transaction must be matched with multiple transactions. Recon-Plus also teaches a dynamic matching that automatically matches as many items as possible based on matching criteria entered by the user. The multiple pass engine in Recon-Plus automatically matches transactions to achieve the highest possible match rate.

However, regarding claims 1, 15, 21, 34, 40 and 50, Recon-Plus taken either individually or in combination with the other prior art of record fails to teach or suggest that a particular recursive method that includes responsive to one value of a transaction in the second input parameter equaling the first input parameter, returning a transaction list including the transaction having the one value, responsive to no values of transactions in the second input parameter equaling the first input parameter and the second input .parameter containing only one transaction, returning an indicator that no match was found, and responsive to no values of transactions in the second input parameter equaling the first input parameter and the second input parameter containing more than one transaction, performing the recursive submethod using a modified first input parameter and a modified second input parameter, the modified second input parameter omitting a selected transaction and the modified first input parameter being

obtained by subtracting the value of the selected transaction from the first input parameter.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Drawings

The drawings were received on March 24, 2000 are acceptable.

Conclusion

The following prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

- Simmons (US Patent No. 5,093,787) discloses an electronic checkbook with automatic reconciliation.
- Malcolm (US Patent No. 7,263,527) discloses grouping selected transactions in an account ledger.
- Riehl, et al. (US Patent No. 7,062,456) discloses a system and method for back office processing of banking transactions using electronic files.
- Miksovsky, et al. (US Patent No. 5,918,216) discloses an automatic recognition of periods for financial transactions.
